

Volunteers for Local Recycling Station

As a rural based organization the Grange is concerned about preserving the ecology of the environment both for present and future generations. So it is not unusual that supporting local efforts to recycle disposed items is a long-time commitment for our organization.

For more years than almost anyone can remember, Grange volunteers have staffed the monthly Greenwood recycling collection station in Millerstown for July. Saturday, July 25th saw about a half dozen volunteers from Perry Valley Grange at the Millerstown area park from 8-10 AM to accept donations of recyclable glass, metals and paper.

When recycling for the day concluded, the Grange volunteers plus the managers of the monthly collection were treated to a home cooked breakfast at the Grange Hall. As always, this was a fun activity that, in some small way, helps to keep our land a cleaner place.
